

# What size am I?

## How to measure

- Get a shirt that you are comfortable wearing now
- Lay out flat
- Measure across 25mm under arm holes
- This is your half chest measurement
- Go to the appropriate chart for the shirt you are buying
- Compare your measurement to the half chest measurement on the chart.
- This is your size
- If you are borderline it is recommended to go up a size as garments are hand made and can vary up or down slightly.

Sizing is the responsibility of the buyer
